

Description

Wall

Wall is the reinterpretation of a classic umbrella. The special shape allows to place the pole next to the wall, so that once closed, the umbrella does not take up space. In the model 2x2 m the pole can be placed in a corner, therefore is ideal for those with limited space. It is suitable for use in both contract (hotels, bars and restaurants ...) and residential settings (homes, balconies and private gardens). The ribs can be replaced individually without dismantling the structure and the cover can be easily removed for maintenance or replacement. The frame is made of aluminum and the hardware of stainless steel for superb durability. Pulley operated for easy opening. The Wall can be supplied with a base dedicated to its particular shape. All FIM Products are designed and made in Italy using the finest materials for outdoor use ensuring long life even under the harshest environmental conditions.

Solution dyed Acrylic Fabric

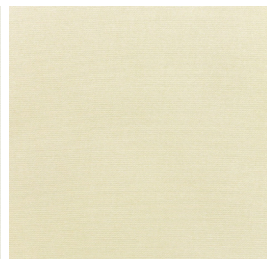

Designed for outdoor use, the solution (spun) dyed acrylic fabric resists salt water, chlorine and any type of harsh climate. Colours do not bleed and remain vibrant for a long time. A specific treatment makes the fabric water repellent, mould resistant and protects it from staining. This type of fabric resists the most extreme conditions and is suitable for year-round use in gardens, terraces, pool sides or on-board boats. It's definitely the top choice canopy fabric to select for your Product. UPF 50+ (UV Protection Factor) 280 gr/m2.

Airfim Fabric

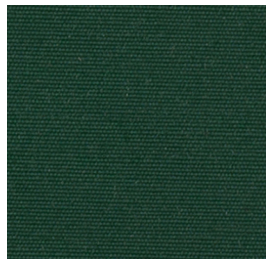

Waterproof fabric assuring total protection from rain, which does not even permeate the stitches. A stain-resistant treatment contributes toward a better dirt resistance of the fabric, too. A regular wash with a neutral cleaning agent guarantees a long lifespan. UPF 80 (UV Protection Factor) 190 gr/m².
